## Definindo preferências de notificação

Por padrão, o GeoNode envia notificações aos usuários para eventos nos quais os usuários podem se inscrever, como uma nova camada carregada ou uma nova taxa adicionada a um mapa. Você pode ajustar suas configurações de notificação clicando no link [Notificações](#) da página *Perfil* (consulte [Atualizando o perfil](#) ).

### ⓘ Nota

Certifique-se de ter um endereço de e-mail confirmado para o qual os avisos podem ser enviados. Caso contrário, consulte [Associando sua conta a um email](#) .

Agora marque / desmarque os tipos de notificação que deseja receber ou não. É possível ser notificado sobre os eventos mostrados na figura abaixo.

## Notification Settings

Notification Type	Email
<b>Request to download a resource</b> A request for downloading a resource was sent	<input checked="" type="checkbox"/>
<b>Layer Created</b> A Layer was created	<input checked="" type="checkbox"/>
